Water Saver/Dry Soils

Dry soils, prone to drought can rejoice

Designed for areas of extremely dry, thin and sandy soil that are prone to drought. Also ideal for areas of normal soil conditions that are subject to restricted water usage.

- Developed for drought prone soils
- Ideal for areas where water usage is restricted
- Contains tall fescue, the most drought tolerant species for the UK climate
- Excellent wear tolerance once established

In the bag

50% Tall fescue

50% Perennial ryegrass

Sowing rate:	35-50g per m ²
Height of cut:	Down to 25mm
Pack sizes:	20kg
