

Supreme

Intensive production from grazing with this highly palatable ley

- Intensive production from a highly palatable, very digestible ley that will give maximum dry matter intake
- SUPREME is a dense, productive, long-term, intensive grazing mixture, designed to give the option of taking later cuts of top quality silage
- Contains Timothy and a higher diploid ryegrass percentage for ground cover and persistence
- Consistent seasonal performance is provided by exceptional spring growth (125%) from Callan, followed by Ballintoy giving 8% more forage than control in mid-season and 110% autumn growth, ensuring this mixture delivers a long grazing season which matches demand from turnout to late autumn
- Creates a tight persistent sward which is highly resistant to poaching with Drumbo rated A for ground cover
- Ensign white clover blend is included for nitrogen fixation and increased protein content
- Contains only first choice SRUC varieties

In the bag

5.00kg	Callan	Late Perennial Ryegrass (DIP)
5.00kg	Drumbo	Late perennial Ryegrass (DIP)
3.00kg	Ballintoy	Late perennial Ryegrass (TET)
1.00kg	Comer	Timothy
1.00kg	Ensign	White Clover Blend

Sowing rate per acre: 15kg per acre

Sowing rate per m²: 2,979 seeds per m²
