

E10

Clay/Waterlogged Soils

Flood prone areas and waterlogged soils

Formulated for areas that are prone to periods of short-term flooding and seasonal waterlogging.

- Ideal for Sustainable Drainage Systems (SuDS)
- Tolerant of extended periods of waterlogging
- Deep-rooting to stabilise soil
- Suitable for areas that are dry through summer and wet through winter
- Able to recover from short periods of flooding

E10	
Usage:	Areas that prone to periods of short-term flooding and seasonal waterlogging
Mixture Formulation:	40% Tall fescue
	40% Perennial ryegrass
	20% Strong creeping red fescue

How to use it	
Sowing rate:	30-40g per m ²
Height of cut:	Down to 25mm
Pack size:	20kg
