Ultimate Overseeding Performance

Turf Type Annual Ryegrass

First introduced in 2006, Barenbrug's SOS mixtures with turf annual ryegrass have become the #1 selling turf annuals in the world. Ideal for the economical over-seeding of warm season turf or cool weather over-seeding of cool season sports turf, SOS provides the benefits of annual ryegrass plus significantly improved turf quality and overall performance.

- ▶ Improved turf-type annual ryegrass blends and mixtures with fast, natural, uniform spring transition
- ▶ Fast germination and establishment, out-competing annual blue and many other weeds
- ▶ Excellent germination in cooler temperatures in late Fall and early Spring
- ▶ Significantly improved turf quality over traditional annual ryegrass
- ▶ Tolerates fairway cutting heights with significantly improved traffic tolerance over traditional annual rye
- ▶ Three generations of turf varietal improvement available
- ▶ Very economically priced when compared to perennial ryegrass and faster to establish

Now With New Technology!

SOS 400 - Our most economical 100% turf-annual, featuring the original Panterra. Ideal for parks, driving ranges, fairways, homes and all general-purpose over-seeding.

SOS 211 - A 50-50 mixture of turf-annuals and perennial ryegrass. Featuring both Panterra and Panterra V, this mixture provides the immediate benefits of turf-annual rye plus the added turf-quality and persistence of perennial ryegrass. Ideal for locations requiring more spring persistence and improved turf quality.

SOS 220 - State of the ART, TerraBar and BarTerra turf-annuals blended together in a 100% turf-annual mix. Provides the very best in turf-annual turf quality; with '3rd generation' color and appearance plus all of the benefits of an annual ryegrass. Ideal for those areas requiring the 'best look', economy, and natural spring transition.
