

Permanent (no clover option)

Intensive long-term grazing mixture with cutting option without clover.

- PERMANENT (no clover) is a blend of perennial ryegrass, and Timothy designed to give season-long production from a dense, prolific ley
- The omission of clover in the mixture allows for cost effective weed control
- PERMANENT (no clover) produces a dense, leafy, persistent and easily managed ley that produces highly palatable and digestible grass.
- This long-term mixture gives the option of taking later cuts of top quality silage
- The tetraploid varieties in PERMANENT (no clover) have been carefully selected to ensure higher water soluble carbohydrate content while not sacrificing sward density
- Includes *Clanrye*, one of the highest yielding late heading perennial ryegrasses (100% of control varieties)
- Contains *Gosford*, a new variety for 2019, with excellent silage and grazing yields combined with impressive sward density
