

Yellow Jacket Water Manager Fescue

Golf and bowling greens, tees and fairways

Usage

Overseeding and/or **construction** of free-draining fine-turf areas; golf and bowling greens; tees and fairways.

Key points

- Premium fescue blend, enhanced with the addition of Yellow Jacket Water Manager seed coating.

Species Formulation

60% slender creeping red fescue
40% Chewings red fescue

YELLOW JACKET WATER MANAGER FESCUE is an outstanding blend of three red fescue cultivars: Viktorka, Barcrown, and Ramona, for the overseeding and construction of free-draining fine turf. The mixture is made up of 60% slender red creeping fescue and 40% chewings red fescue seed which offers the best solution for year-round performance and growth in fescue-dominant turf.

Yellow Jacket Water Manager: Yellow Jacket Water Manager ensures precisely the right balance of moisture for both optimum germination and establishment. The coating ensures that moisture is locked around the seed giving improved germination, even in extreme conditions. The patented technology is the result of a research project by Barenbrug and Aquatrols and has been independently tested by the STRI.

IN THE BAG

40%	Viktorka slender creeping red fescue
20%	Barcrown slender creeping red fescue
40%	Ramona Chewings red fescue

Sowing rate:	25 - 35g/m ²
Oversowing rate:	15 - 25g/m ²
Sowing depth:	8 - 12mm below thatch
Mowing height:	Down to 4mm
Pack size:	10kg

Phase 1: Water distributes the Water Manager throughout the soil to create a Plant Survival Zone.

Phase 2: The Plant Survival Zone ensures that each seed has enough water to germinate and manages the moisture content around the seeding during its establishment.

Phase 3: The grass seedlings are less affected by abiotic stress, so more plants survive.
