

Long Season

Flexible long-term. A perfect mixture for extended grazing.

- Spring grass is extremely valuable as it replaces expensive feed or silage
- LONG SEASON has been designed to provide exceptional spring growth, the time of year when grass is most valuable
- LONG SEASON is an extremely flexible, persistent, long-term ley that can be both cut and grazed as required
- Includes *Moyola* with spring growth of 122% of control varieties
- Contains *Callan*, new for 2020 - excellent grazing yields with exceptional spring growth producing 14% more grass in early spring than comparative varieties and has an excellent first silage cut
- Contains *Gosford*, an intermediate heading diploid perennial, which is already proving its worth with high silage and grazing yields combined with excellent sward density
- The inclusion of *Comer* Timothy increases spring growth by 34% and persistence under more extreme conditions
