

RPR Golf

Tees, fairways, walkways, roughs

RPR GOLF is a blend of perennial ryegrasses for use in areas of intensive golf traffic, delivering turf with exceptional wear tolerance, fast recovery and good aesthetics.

Barlibro is a Regenerating Perennial Ryegrass (RPR) that produces stolons as it establishes and grows. Figure 1 shows a *Barlibro* plant grown for a single seed at 15 months old. The stolons and new secondary branches of growth can be seen clearly. The lateral growth habit results in fast establishment between seeding lines and unparalleled capacity for recovery after and during wear.

Europitch is a medium-fine ryegrass with outstanding tolerance to wear. It is ranked #4 in Table S1, BSPB/STRI Turfgrass Seed 2021.

Baromario is another excellent ryegrass for all-round performance, with scores above 7.0 in both S1 and L1 Tables of Turfgrass Seed. Its rich mid-green genetic colour is an additional trait of interest.

How to use it	
Sowing rate:	25-50g per m ²
Oversowing rate:	20-30g per m ²
Sowing depth:	10-15mm below thatch
Mowing height:	Down to 12mm

RPR GOLF		
Usage:	Overseeding, divoting and / or construction of golf turf with intense wear and HoC > 12mm e.g walkways	
Species Formulation:	100% Perennial ryegrass	
Mixture Formulation:	25% BARLIBRO	RPR Perennial ryegrass
	40% EUROPITCH	Perennial ryegrass
	35% BAROMARIO	Perennial ryegrass
