

Turf Star® RPR

Golf, Multi-Use Sports Fields, Parks, & Lawns

Rapid Germination

Deep Green Color

Quick Wear Recovery

Insect Tolerance

Key features

- Low growth habit
- Thrives in diverse environments
- Proven overseeding performance
- Excellent mowing quality

Seeding Rates:

Square Feet	8-10lbs./M*
Acres:	350-435 lbs./acre
Cool Season Overseed:	4-15 lbs./M*
Warm Season Overseed	10-15 lbs./M*

*M=1,000 square feet

Other Perennial Ryegrasses

Top Flight™
XPC™
Duo Pro™

A mixture of RPR varieties and elite perennial ryegrass, Turf Star RPR is the solution for all golf, sports, and recreational facilities where elite perennial ryegrass quality is required.

Turf Star RPR's extreme wear tolerance and ability to recover thin and damaged turf is unique to the industry. Extremely fast germinating and quick to establish, Turf Star RPR can also be over-seeded into traditional cool season turf lawns, such as Kentucky bluegrass, fine fescue, and traditional perennial ryegrass.

Technical Information

Determinate Stolons

Receiving its utility patent in 2015, RPR can tolerate extreme heavy traffic and displays outstanding recuperative abilities. It provides excellent turf quality and appearance in the harshest of conditions, gets off on the right foot with early establishment, and continues to thrive through summers. RPR is the ideal selection for all applications receiving heavy, destructive traffic.

Establishment

Plant in the fall when evening temperatures begin to cool, but late winter and early spring plantings may be done in order to repair worn areas from the year prior. Verticutting or scalping the current sward ensures initial seed-to-soil contact. It is essential to maintain ample soil moisture of the first few weeks so the seed imbibes and germinates rapidly. Frequent mowing and fertilization are recommended for optimal results. With ideal irrigation and soil contact, germination should be fully established within 14 to 21 days after seeding. When used as an inter-seeding agent, additional water may be supplemented to ease the transition from low to high temperatures in late spring.

Applications

Turf Star RPR is a superior quality perennial ryegrass blend ideal for high caliber golf courses, sports fields, and recreational facilities in cool-to-temperate climates. Featuring strong resilience and dark green genetics, Turf Star RPR is the finest choice for high traffic areas that need to remain aesthetically pleasing. Additionally, Turf Star RPR is an excellent choice for fall inter-seeding turf to provide a boost in the current stand's quality after summer stress.
