

NEW CONCEPTS

Regenerating Perennial Rye

- Perennial ryegrass with pseudo-stolons
- Number one choice in intense wear tolerance such as tournaments
- Outperforms traditional perennial ryegrass
- Increased disease resistance
- Increased insect resistance
- Trademark exclusive to Barenbrug

The strength of RPR comes from the added lateral growth, providing extra stability and strength to the field. "Anyone who knows my philosophy regarding seeding knows that I have a very high standard, that's why I am still amazed how RPR has performed. With the experience I have had with RPR, I am more than happy regarding colour, strength and establishment. I would definitely recommend it to whoever inquired".

Western Province Rugby head grounds curator, Julian Barnard.

RTF

- Rhizomatous Tall Fescue
- Marketed as Turf Saver
- Repairs itself. The rhizome roots fill in bare spots in a thinning lawn
- Produces a thick, even, lush, soft-to-the-touch turf
- Promotes deep-rooting plants with great tolerance to heat and dry conditions
- Saves on overseeding costs of damaged turf

SOS

- Annual turf-type rye grass
- Overseeding made easy
- Easy transition
- Easy on your budget
- Huge improvement on turf characteristics e.g. colour and texture

HGT

- Kentucky Blue Grass
- Eliminate Summer Patch
- Thrives in heat
- Unrivalled traffic tolerance
- Exceptional Spring Green up
- Defeat Billbug and White Grubs

Yellow Jacket

- A first ever combination of top-rated bentgrass varieties and revolutionary new Yellow Jacket® seed coating
- Significant improvements in germination and establishment
- Yellow Jacket less prone to diseases
- Reduced water consumption
- Reduced establishment costs
- Makes seeding easier/more accurate

Cool Season Grasses

Kind	Seeding Rate	What to use where	Description/Characteristics	Variety
Creeping Bent	10g/m ²	Putting greens	• Creeping cool season grass	Bengal
			• Self repairing	A1
			• Withstand low mowing height	A4
			• Good disease resistance	BARSA Bent Blend
			• Quick ground cover	
			• New concept (Yellow Jacket Bent)	
Annual Rye	40g/m ²	Winter overseeding on warm season grasses	• New concept (SOS)	SOS 400
			• High water requirement	
			• Frequent irrigation	
			• High mowing height	
			• No winter dormancy	
			• Susceptible to diseases	
			• Very fast to establish	
			• Transitions out completely after winter	
Perennial Rye	40g/m ²	Sport fields Fairways	• New concept: Regenerating Perennial Ryegrass	RPR Barbeta
			• High water requirement	Barlennium
			• Frequent irrigation	
			• High mowing height	
			• No winter dormancy	
			• Susceptible to diseases	
Tall Fescue (Turf type)	40g/m ²	Tee-boxes Shady areas Water logged conditions	• Fairly drought resistant	Turfsaver
			• Withstand waterlog conditions	
			• High mowing height	
			• No winter dormancy	
			• Shade tolerant	
Fine Fescue Creeping Red Chewings	40g/m ²	Roughs Hydroseeding	• Hardy grass	Barrister 3
			• Very fine texture	Bridgeport 2
			• Withstand waterlog conditions	
			• High mowing height	
			• No winter dormancy	
			• Shade tolerant	
Blue Grasses POA Trivialis Kentucky Blue True Putt Blend	40g/m ² 20g/m ² 40g/m ²	Sport fields, shady areas, fairways Shady areas, putting greens	• Creeping cool season grass	Snowbird
			• Very dark green colour	Barduke
			• No winter dormancy	3-way Blend
			• Shade tolerant	
			• Susceptible to diseases – HGT (Barduke)	
			• HGT – Healthy Grass Technology	

Warm Season Grasses

Kind	Seeding Rate	What to use where	Description/Characteristics	Variety
Kikuyu	2g/m ²	Sport fields (Rugby/Soccer) Recreational areas Horse race tracks	• Winter dormant	Whittet
			• High N requirement	
			• High water requirement	
			• Tolerance against diseases	
			• No shade tolerance	
Cynodon dactylon	20g/m ²	Sport fields (Hockey/Cricket) Fairways, Roughs, Polo fields, Horse race tracks	• Winter dormant	Riviera
			• Low pH soils	Barbados
			• Low water requirement	Common
			• Sandy / marginal to clay soils	
			• Low maintenance	
			• No shade tolerance	
Paspalum notatum (Bahia grass)	20g/m ²	Water logged conditions Polo field Horse race tracks	• Winter dormant	
			• High saline soils	
			• Low maintenance	
			• Water logged conditions	
			• No shade tolerance
