

Medicago sativa

Key Features

- Greatest winter activity rating of 10
- Suited to cropping rotations, pasture mixes and year round hay production systems
- Improved forage production and persistence over SARDI 10
- High winter growth and grazing tolerance
- Very good seedling vigour
- Highly productive 3 - 4 year + option
- Multiple screens for excellent disease and insect resistance.

Description

SARDI 10 Series 2 is a highly winter active alfalfa with the greatest activity rating over any other SARDI variety.

During its development, the breeder was successful in focusing on improving the very popular SARDI 10. The greatest emphasis was on increasing forage production and quality, pest and disease resistance, persistence and grazing tolerance. A key physical feature is the greatly improved leaflet density down the length of each stem. These advancements allow for even greater adaptability to any farming systems.

Pest Resistance

SARDI 10 Series 2 is highly resistant (HR) to Spotted Alfalfa Aphid (*Therioaphis trifolii*) and Blue-Green Alaphid (*Acyrtosiphon kondoi*). As with other alfalfa varieties, SARDI 10 Series 2 is susceptible to damage from Red Legged Earth Mite (*Halotydeus destructor*) and control measures need to take place prior to seeding or soon after germination. AgriCOTE seed will aid establishment in these circumstances.
