

**Permanent**

Intensive long-term grazing mixture with cutting option.

- PERMANENT is a blend of perennial ryegrass and white clover designed to give season-long production from a dense, prolific ley
- This long-term mixture gives the option of taking later cuts of top quality silage
- Trials at Moorepark in Eire have shown that cows grazed on this type of ley will produce more milk
- The tetraploid varieties in PERMANENT have been carefully selected to ensure higher water soluble carbohydrate content while not sacrificing sward density
- Contains *Callan* - new for 2020 - excellent grazing yields with exceptional spring growth producing 14% more grass in early spring than comparative varieties and has an excellent first silage cut
- *Ballintoy* produces excellent silage yields and digestibility and provides quality grazing swards throughout the year
