

Long Season (no clover)

Flexible long-term. A perfect mixture for extended grazing.

- Spring grass is extremely valuable as it replaces expensive feed or silage
- LONG SEASON has been designed to provide exceptional spring growth, the time of year when grass is most valuable
- LONG SEASON is an extremely flexible, persistent, long-term ley that can be both cut and grazed as required
- Includes *Moyola* with spring growth of 122% of control varieties
- Contains *Gosford*, new for 2019, an Intermediate heading diploid perennial, which is already proving its worth with high silage and grazing yields combined with excellent sward density
- The inclusion of *Comer* Timothy increases spring growth by 34% and persistence under more extreme conditions
- The omission of clover in the mixture allows for cost effective weed control
- The varieties are selected to give a palatable and responsive sward with excellent persistency
