

TEES, FAIRWAYS, WALKWAYS

RPR GOLF is a blend of perennial ryegrasses for use in areas of intensive golf traffic, delivering turf with exceptional wear tolerance, fast recovery and good aesthetics.

Baribro is a Regenerating Perennial Ryegrass (RPR) that produces stolons as it establishes and grows. Figure 1 shows a *Baribro* plant grown from a single seed at 15 months old. The stolons and new secondary branches of growth can be seen clearly. The lateral growth habit results in fast establishment between seeding lines and unparalleled capacity for recovery after and during wear.

Eurocordus is a medium-fine ryegrass with outstanding tolerance to wear. It is ranked #3 for sports wear in Table S1, BSPB Turfgrass Seed 2018.

Barsignum is an outstanding summer sports ryegrass, ranked #4 in Tables L1, G4 and as an average of all ryegrass tables in BSPB Turfgrass Seed 2018. It is ranked #1 for visual merit and slow regrowth in Table L1.

Figure 1: Photographs of a 15-month old *Baribro* plant grown from a single seed.

Baribro determinate stolons and subsequent formation of new plants

100% perennial ryegrass

35% **BARLIBRO**
RPR perennial ryegrass

35% **EUROCORDUS**
Perennial ryegrass

30% **BARSIGNUM**
Perennial ryegrass

Usage **Overseeding, divoting** and/or **construction** of golf turf with intense wear; tees, fairways, walkways.

Baribro RPR delivers fast establishment and unparalleled capacity for recovery from wear due to stoloniferous growth habit.

Key points *Eurocordus* #4 for L1 and S1 combined; all-rounder with exceptional wear tolerance, recovery and fast growth.

Barsignum #4 Mean in L1; #1 for Visual Merit and very fine-leaved.

Sowing rate 25-50g per m²

Oversowing rate 20-30g per m²

Sowing depth 10-15mm

Mowing height down to 10mm
