

E16-C

Embankment & Ground Cover plus Clover

Our E16-C mixture with the added benefit of small leaf white clover.

- White clover fixes nitrogen, making this the best choice for very thin, impoverished soils.
- Creeping and deep-rooted grass species to stabilise and bind soil

In the bag

20%	Perennial ryegrass
20%	Strong creeping red fescue
15%	Annual ryegrass
12.5%	Slender creeping red fescue
12.5%	Tall fescue
10%	Hard fescue
5%	Bentgrass
5%	White clover

Sowing rate: 25-50g per m²
higher sowing rates for steep slopes
Height of cut: Down to 50mm
Pack sizes: 20kg

Added clover to steep embankments
