

Protein Sile

An excellent low input, high output, high protein cutting ley for three to four years with the option to graze.

- An intensive cutting mix that will produce up to four prolific cuts of leafy, high protein forage per year, with the option to graze cattle or finish lambs (although it's not advisable for breeding sheep due to phytoestrogen production)
- Animals fed on red clover / grass silage will eat more and perform better than those fed on grass silage alone due to increased intakes and protein levels
- Designed for yield and persistence, combining the yield of the grasses with additional protein from the *Ensign Red* clover blend
- This mixture 'fixes' up to 200kg/Ha of nitrogen, meaning it grows with no applications of bagged nitrogen
- Trials have shown a 3% improvement in kill out percentage for lambs finished on red clover
- The high clover content will benefit from a pH of 6 or more and close attention to P and K levels

In the bag

2.00kg	Barsilo	Hybrid Ryegrass (DIP)
4.75kg	Aston Crusader	Hybrid Ryegrass (TET)
4.00kg	Fintona	Intermediate perennial Ryegrass (TET)
3.00kg	Ensign Red	Red Clover Blend
0.25kg	Barblanca	Large White Clover

Sowing rate per acre: 14kg per acre

Sowing rate per m²: 1,208 seeds per m²
