

# ACCENT II™

## Perennial Ryegrass

Dark Color

Wear Tolerance

Early Spring Greenup

Accent II offers a dark green, dense stand of turfgrass that will establish quickly and hold up to wear, disease, and a broad range of environmental conditions.

### Key features

- Superior Wear Tolerance
- Seedling Vigor
- Spring Greenup
- Winter Hardiness

**SUPERIOR  
WEAR  
TOLERANCE**

### Maintenance

Seeding Rate:	5-10lbs./M*
Overseeding Rate (Warm):	10-15lbs./M or 200-500lbs./acre
Mowing (Recommendation):	2.0-3.0"
Mowing (Down to):	0.500"

\*M=1,000 square feet

### Technical Information

#### Applications

*Permanent sports turf in cool climates:* excellent wear tolerance, seedling vigor, spring and summer density, winter hardiness.

*Winter overseeding in warmer climates:* seedling vigor, good quality at ½" mowing height.

#### Specifications

Accent II performs well under high, medium, and low input maintenance levels. In university traffic trials it has proven to be one tough grass with great resilience. At Michigan State University under simulated traffic, Accent II demonstrated superior wear tolerance and maintained high percent living ground cover. Accent II performs well in the transition zone, but has also demonstrated superior cold tolerance and adaptation in more northern climates. In university trials at North Dakota and Wisconsin with serious winter kill, Accent II ranked among the top 10, clearly demonstrating its superior winter survival and adaptation
