

## Get your MOJO Back.

Mojo is Barenbrug USA's Yellow Jacket® Enhanced crabgrass that works like magic during the hot dry months. A high quality, high yielding summer annual forage, Mojo is excellent for grazing and haying.

### The MOJO Advantage

- High quality summer feed
- Quick drought recovery
- Widely adapted
- Easy to establish
- High yielding summer annual

	Holly Springs	Prairie	Starkville	Newton	Poplarville	AVG
Mojo	2598	4389	5166	6682	4983	4763

Dals big river	2580	4367	5340	5340	5050	4138

Mississippi State Trials: 2018

## MOJO: Now Including Impact

Impact crabgrass was released from Noble Research Institute for forage livestock producers needing a later-maturing cultivar than Red River but one that is also broadly adapted, high-yielding, and with improved nutritive quality and good reseeding ability.

### Average Gain

**1.6**

pounds per day of weight gain per acre during a five-year period.

**192**

pounds of live weight gain per acre during a five-year period.

Noble Research Institute: 2013-2018

	Study Years	Total Gain (lbs/acre)	Average Daily Gain
Impact Crabgrass	5	192	1.6

Noble Research Institute: 2013-2018

Impact crabgrass (left), on average, heads out 10 days later than Red River (right), resulting in later maturity and improved forage quality.
