

Hybrid 4x4

A highly productive mixture designed for silage.

- HYBRID 4x4 is a highly productive hybrid ryegrass cutting ley, designed for four years and providing four cuts each year
- It's designed for a three or four year rotation system, delivering 20% higher yield than traditional perennial ryegrass mixtures
- A key benefit of this mixture is that it offers multiple exits and entries for slurry / digestate application, using home produced nutrients more efficiently, saving valuable time and resources
- HYBRID 4x4 delivers a superb silage mixture to farmers
- It has a very tight heading date range and excellent resistance to disease, offering strong silage production throughout the season
- This mixture does not contain clover, so is inexpensive to clean up sward
- Perfect if three and four year rotation is required

In the bag

4.00kg	Novial	Hybrid Ryegrass (TET)
2.00kg	Barsilo	Hybrid Ryegrass (DIP)
4.00kg	Kirial	Hybrid Ryegrass (TET)
4.00kg	Aston Crusader	Hybrid Ryegrass (TET)

Sowing rate per acre:	14kg per acre
Sowing rate per m²:	1,025 seeds per m ²

- Multiple exits and entries for slurry / digestate application, using home produced nutrients more efficiently
- Will produce 20% more yield than perennial ryegrass leys, due to its ability to use all nutrients very efficiently via its long season growth and usage of deep rooting varieties
