

RPR Golf

Tees, fairways, walkways, roughs

Usage

Overseeding, divoting and/or construction of golf turf with intense wear and HoC >12mm e.g. walkways

Key points

- *Barlibro* RPR delivers fast establishment and unparalleled capacity for recovery from wear due to stoloniferous growth habit.
- *Europitch* #3 S1; top-20 in L1
- *Barcristalla* #11 in S1

Species Formulation

100% perennial ryegrass

RPR GOLF is a blend of perennial ryegrasses for use in areas of intensive golf traffic, delivering turf with exceptional wear tolerance, fast recovery and good aesthetics.

Barlibro is a Regenerating Perennial Ryegrass (RPR) that produces stolons as it establishes and grows. Figure 1 shows a *Barlibro* plant grown for a single seed at 15 months old. The stolons and new secondary branches of growth can be seen clearly. The lateral growth habit results in fast establishment between seeding lines and unparalleled capacity for recovery after, and during wear.

Europitch is a medium-fine ryegrass with outstanding tolerance to wear. It is ranked #3 in Table S1, BSPB/STRI Turfgrass Seed 2020.

Barcristalla is another outstanding ryegrass for wear tolerance, ranked #11 in Table S1. Its high disease tolerance and darker genetic colour are additional traits of interest.

IN THE BAG

40% **BARLIBRO**
RPR perennial ryegrass

30% **EUROPITCH**
Perennial ryegrass

30% **BARCRISTALLA**
Perennial ryegrass

Sowing rate: 25-50g per m²
Overseeding rate: 20-30g per m²
Sowing depth: 10-15mm
 below thatch
Mowing height: Down to 12mm
Pack size: 20kg
