

# SUPERFAST WINTER GRASS SEED

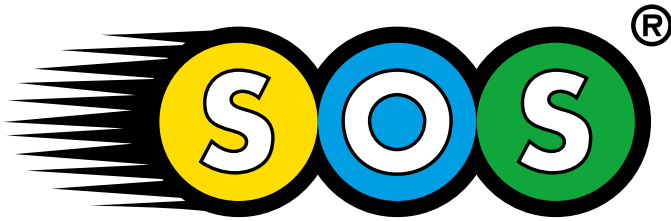

ULTIMATE PATCHING KIT

GERMINATES AT 3.5°C

EXCEPTIONAL WEAR TOLERANCE

## Superfast winter grass seed

The ultimate patching repair kit in cool temperatures.

Barenbrug research shows that amenity annual ryegrasses germinate more quickly and at lower temperatures than perennial ryegrass, including tetraploid varieties.

- Superior germination and establishment in very cool soil temperatures to maintain year-round sward cover
- Figure 1 illustrates the speed at which SOS can establish and restore a sward when it is overseeded in January at a soil temperature of 6.2°C. One month into the trial the grass cover has recovered from 20% to more than 60%.
- *Barterra* is the latest generation Barenbrug-bred amenity annual ryegrass that will germinate at temperatures as low as 3.5°C, making it the ideal tool to maintain grass cover throughout the winter
- *Barcristalla* provides longevity to the blend with excellent performance characteristics, wear tolerance and disease resistance
- *Barcristalla* offers exceptional Drechslera leaf spot tolerance

### IN THE BAG

50% **BARTERRA**  
Annual ryegrass

50% **BARCRISTALLA**  
Perennial ryegrass

### HOW TO USE IT

Oversowing rate	20-40g per m <sup>2</sup>
Sowing rate	30-40g per m <sup>2</sup>
Sowing depth	4-8mm
Mowing height	down to 20mm

### INFO

Pack size 20kg
